<i>(Please insert your comments) pas assez! L'auteur ne dit pas : - comment les mesures ont été faites! - Quelle est le type de magasin (paillote ?, en matériaux définitifs ?, etc.). - les conditions de stockages pas clairement présentées - lorsque vous contrôlez les 55 bulbes marqués, ne vous est-il pas arrivé de trouver dans le magasin d'autres pourris ou qui ont germé en dehors de ces 55? Aussi, la taille de l'échantillon est très faible pour une telle étude. En un mot, le dispositif n'est pas solide.</i>

Comments and Suggestions to the Author(s):

Un effort de relecture et de rédaction est souhaité !

L'introduction souffre de manque de clarté ! Les idées sont décousues et la problématique pas suffisamment mise en exergue !

Pour la partie résultats et discussion, je la trouve très sobre surtout conforme aux normes par endroit!
