<i>Questions</i>	<i>Rating Result</i>
	[Poor] 1-5 [Excellent]

1. The title is clear and it is adequate to the content of the article.	5
<i>I believe that the title is very adequate to the content, and stimulant for reader</i>	
2. The abstract clearly presents objects, methods and results.	4
<i>The abstract includes sufficient information to define the paper's focus; some improvements need (see attached file)</i>	
3. There are few grammatical errors and spelling mistakes in this article.	3
<i>I am not a native English speaker, but I have identified some complex paragraphs or sentences with inadequate technical terms (eg "number" for "size" of populations). Other problems may be present: please check</i>	
4. The study methods are explained clearly.	4
<i>Study methodologies are clear. Data sources are very concisely described: greater clarity would be desirable. The time interval of the study must be explained clearly</i>	
5. The results are clear and do not contain errors.	4
<p><i>The results are clear, assuming that Authors previously explained the time limits of the used data.</i></p> <p><i>I do not understand why tables and figures are so much small (and difficult to read) respect the text: especially the figures, which lose so much clarity when printed (and should be named "Figure 1", "Figure 2", "Figure 3", not "Chart").</i></p> <p><i>Table titles are not standardized: title "Table n" sometimes becomes "Tab. n": please standardize.</i></p>	
6. The conclusions or summary are accurate and supported by the content.	4
<i>Conclusions resume adequately the study frame and its results, deepening the social consequences of the findings</i>	
7. The references are comprehensive and appropriate.	2
<p><i>Most of the titles shown were not cited in the paper, and are therefore useless (and according to the standards of scientific publishing they must be removed). The rest should be standardized in their format.</i></p> <p><i>If any title is considered indispensable by the Authors, it should be cited in the appropriate part of the paper</i></p>

Comments and Suggestions to the Author(s):

Refine text and, moreover, references. See Attached file.

Comments and Suggestions to the Editors Only:

I hope that the revisions that I have requested of the Authors do not create problems for the publication of the paper: in particular, the request to make the tables and especially the figures more readable, which could lead to an excessive development of pages.
