The TITLE is clear and it is adequate to the content of the article.

Shorten the title
At 16 years of age the patient is an adolescent rather
I would suggest
T-cell/histiocyte-rich large B-cell lymphoma in an adolescent from Abidjan-Ivory
coast: case report

The ABSTRACT clearly presents objects, methods, and results.

Acceptable

There are a few grammatical errors and spelling mistakes in this article.

The paper requires a major polishing of the English language and scientific writing

The study METHODS are explained clearly.

Was informed consent obtained from the patient and his legal guardians for the
presentation of this paper?

The body of the paper is clear and does not contain errors.

Partly
Please enrich the case with the images from the pathology report and IHC

The CONCLUSION or summary is accurate and supported by the content.

Acceptable

The list of REFERENCES is comprehensive and appropriate.

Can be improved by adding new titles and referencing the new WHO and ICC
classifications
