**Please give each evaluation item a numeric rating on a 5-point scale, along with a thorough explanation for each point rating.**

<i>Questions</i>	<i>Rating Result</i> [Poor] 1-5 [Excellent]
<b>1. The title is clear and it is adequate to the content of the article.</b>	3
(Please insert your comments)  Le titre de l'article est bon dans l'ensemble, mais il peut être plus précis au regard de l'objectif développé. Exemple : Déterminants socio-économiques ...	
<b>2. The abstract clearly presents objects, methods and</b>	<b>2,5</b>

<b>results.</b>	
(Please insert your comments)	
Le résumé de l'article manque de résultats concrets et saillants. Aussi, les méthodes de collecte de données n'y sont pas toutes mentionnées (Voir inputs)	
<b>3. There are few grammatical errors and spelling mistakes in this article.</b>	<b>2,5</b>
(Please insert your comments)	
Les fautes grammaticales et d'orthographe sont négligeables. Cependant, l'emploi de certains termes ne sont pas maîtrisés, notamment « Exploitants et exploitations agricoles ». Ce qui complexifie la compréhension du manuscrit à plusieurs endroits.	
<b>4. The study methods are explained clearly.</b>	<b>2,5</b>
(Please insert your comments)	
La méthodologie est bonne dans l'ensemble mais un peu trop détaillée. Les unités d'observation doivent être clairement revues au regard des objectifs de l'étude.	
<b>5. The body of the paper is clear and does not contain errors.</b>	<b>2</b>
(Please insert your comments)	
Les résultats de l'étude sont mal restitués ; ils manquent d'explication et d'orientation précise (voir les inputs).	
<b>6. The conclusions or summary are accurate and supported by the content.</b>	<b>2</b>
(Please insert your comments)	
La conclusion devra être revue avec des résultats bien perceptibles, surtout en lien avec les remarques faites au corps de l'étude.	
<b>7. The references are comprehensive and appropriate.</b>	<b>4</b>
(Please insert your comments)	
Les références ont été générées de manière automatique. Cependant, certaines d'entre elles sont mal citées dans le corps du manuscrit (revoir). Ecrire Chirwa, 2005 et non Chirwa 2005. Se conformer dans l'ensemble à la note aux auteurs de la revue.

### Comments and Suggestions to the Author(s):

L'étude est pertinente dans l'ensemble, mais les résultats sont mal restitués. La majorité des variables ont besoin d'orientation précise. Dire par exemple que «**80% des producteurs ayant plus de 60 ans pratiquent la vente individuelle**». Les producteurs âgés ont donc la prédisposition à opter pour la vente individuelle » et non se limiter à dire que l'âge est positivement corrélé à la vente individuelle, ce qui ne rend véritablement pas compte de la catégorie d'âge qui pratique la vente individuelle.

Plusieurs outils (graphiques, schémas) peuvent servir à expliciter la restitution.

Aussi, les auteurs doivent tenir compte du fait que les lecteurs de l'article ne sont pas forcément économistes et adapter le manuscrit en conséquence.

**Comments and Suggestions to the Editors Only:**

Conformer la langue de la grille d'évaluation à celle de l'article.
