**Comments and Suggestions to the Author(s):**

**Au niveau de l'introduction, l'auteur doit préciser la question de recherche qui guide cette étude. (les auteurs n'ont pas pris en compte les remarques)**

**Au niveau des résultats, l'auteur doit combiner les caractéristiques et non les placer distinctement comme il a fait dans son travail. ( l'analyse qualitative reste peu exploitée, qu'est ce qui explique ce fait ?)**

**De plus au niveau toujours des résultats, le volet qualitatif qui n'est pas trop visible dans l'analyse. Revoir cette défaillance dans l'analyse des résultats.**

**Au niveau de la bibliographie, il y a un désordre de l'emplacement des années.**  
**(précisez nous la norme choisie et aligner votre référence bibliographique sur ce modèle, car on ne comprends pas cette manière de référencer la bibliographie).**

L'auteur a bel et bien pris en compte les observations. Les remarques mineures n'entâchent en rien la qualité du travail. L'article peut être publié.
