**The TITLE is clear and it is adequate to the content of the article.**

\*

*(Please insert your comments)*

The term thrombophlebitis is no longer in use in the English neurology literature. I suggest they use:

Cerebral venous thrombosis presenting as subarachnoid hemorrhage: a clinical case

**The ABSTRACT clearly presents objects, methods, and results.**

\*

*(Please insert your comments)*

Abstract is clear and concise.

**There are a few grammatical errors and spelling mistakes in this article.**

*(Please insert your comments)*

There are a few grammatical errors and spelling errors in this article.

**The study METHODS are explained clearly.**

\*

*(Please insert your comments)*

Case description is concise and clear.

**The body of the paper is clear and does not contain errors.**

\*

*(Please insert your comments)*

Body is clear and concise

Please verify that Images 1A and 1B are axial MRI images. Please verify that red and yellow arrows point to blood in the subarachnoid space

Please verify that Image 1C is a sagittal venogram with gadolinium and that the blue arrow points to clot in the superior sagittal sinus

**The CONCLUSION or summary is accurate and supported by the content.**

\*

(Please insert your comments)

Conclusion is clear and concise.

**The list of REFERENCES is comprehensive and appropriate.**

\*

Each in-text citation has to be included in the list of references and vice versa.

(Please insert your comments)

Adequate references.
