Comments and Suggestions to the Author(s):

This is a very interesting work indicating the risk factors of ketosis decompensation in hospitalised diabetic patients comparing with a previous study. Nevertheless, the results of the retrospective study should be emphasized in the work as a whole;
The title should be corrected to indicate time and place;
the text should be written in impersonal style;
Thus, the references should be corrected to APA style.
Finally, the necessary revisions are indicated in the text.
