Reject	

Comments and Suggestions to the Author(s):

L'article ne traite pas des infections nosocomiales. Il aborde mieux l'hygiène en milieu hospitalier.

Le problème ou les problèmes qui ont fait l'objet de cette étude ne sont pas posés clairement.

La méthode et matériel d'étude ne sont pas clairement décrits

Les résultats de l'étude sont incomplets et ne portent pas sur les infections nosocomiales. Les personnes interrogées sont uniquement du personnel soignant et leurs retranscrits abordent l'hygiène hospitalière. Il faut faire la part entre infections nosocomiales et hygiène hospitalière.

Les articles présentées dans le travail ne sont pas pertinents car ils ne traitent clairement le sujet ou une partie du sujet.

La discussion et la conclusion dépendront des corrections qui seront apportées
