**The TITLE is clear and it is adequate to the content of the article.**

The title of the article is adequately and clearly describes the general content of the problem and the challenges during Covid-19.

**The ABSTRACT clearly presents objects, methods, and results.**

The ABSTRACT gives information about the research object and the research methods accordingly are selected by the authors. There are general information about the finding in the abstract as well.

**There are a few grammatical errors and spelling mistakes in this article.**

There are a few minor grammatical and punctuation error in the article

**The study METHODS are explained clearly.**

There are not clearly indicated research methods in the article, I would wish to be more information about research design and methods in the paper. In addition this study needs to have quantitative and qualitative research parts, in order the paper to be more representative.

**The body of the paper is clear and does not contain errors.**

In general body of the paper in fine if we don't consider more information about research methods and empirical analysis

**The CONCLUSION or summary is accurate and supported by the content.**

The conclusion is logical based on the literature review, it is well explained and analyzed

**The list of REFERENCES is comprehensive and appropriate.**

In text situation and references are on place and up to date

**The TITLE is clear and it is adequate to the content of the article.**

Yes, the title is adequate and clear.

**The ABSTRACT clearly presents objects, methods, and results.**

This is a literature review. The abstract is correct.

**There are a few grammatical errors and spelling mistakes in this article.**

I am not ready to answer this section

**The study METHODS are explained clearly.**

It is a literature review. The methodological part is not presented because it is a literature review.

**The body of the paper is clear and does not contain errors.**

The main part of the article is correct.

**The CONCLUSION or summary is accurate and supported by the content.**

I think that the conclusion repeats what has been exposed during the rest of the article. The authors should think of another type of more original conclusion.

**The list of REFERENCES is comprehensive and appropriate.**

The list of references is correct.
