Recommendation: Accept Submission

The TITLE is clear and it is adequate to the content of the article.

The title provides a clear indication of the content, mentioning the specific focus on modeling and forecasting of inflation in Ghana.

The ABSTRACT clearly presents objects, methods, and results.

The abstract provides a concise summary of the paper's objectives, methods, and key findings. It gives a clear overview of the research.

There are a few grammatical errors and spelling mistakes in this article.

Based on the provided text, the paper demonstrates a good level of language proficiency with minimal grammatical errors and spelling mistakes. However, a thorough proofreading and editing process could further improve the overall quality of the language and eliminate any remaining errors.

The study METHODS are explained clearly.

The paper clearly describes the methodology used. The article contains a deep statistical analysis with a detailed description.

The body of the paper is clear and does not contain errors.

The paper presents clear results. However, some additional details, such as inflation data from 2012 to 2022, could enhance the clarity and robustness of the results.

The CONCLUSION or summary is accurate and supported by the content.

The conclusions accurately summarize the findings of the study. The conclusions are supported by the information presented throughout the paper.

The list of REFERENCES is comprehensive and appropriate.

The paper includes a list of references, providing sources that are relevant to the topic of inflation. However, it could be further improved by including more recent references and expanding the range of sources consulted.

Overall Recommendation!!!

Accepted, minor revision needed

Comments and Suggestions to the Author(s):

The paper a well-written and informative study. With small modifications, the the quality of tha paper can be even better, but the quality is still good. The only question is how accurately inflation can be predicted from past data. Inflation is influenced by many macroeconomic and world economic factors, past data is only one factor. Perhaps this should be mentioned in more detail in the article.

ESJ *Manuscript Evaluation Form 2023*

This form is designed to summarize the manuscript peer review that you have completed and to ensure that you have considered all appropriate criteria in your review. Your review should provide a clear statement, to the authors and editors, of the modifications necessary before the paper can be published or the specific reasons for rejection.

Please respond within the appointed time so that we can give the authors timely responses and feedback.

NOTE: ESJ promotes peer review procedure based on scientific validity and technical quality of the paper (not perceived the impact). You are also not required to do proofreading of the paper. It could be recommended as part of the revision.
ESJ editorial office would like to express its special gratitude for your time and efforts. Our editorial team is a substantial reason that stands ESJ out from the crowd!
