<b>1. The title is clear and it is adequate to the content of the article.</b>	<b>4</b>
<i>(Please insert your comments)</i>	

The title is clear and indicates that the study focuses on monitoring the spatio-temporal variability of the physicochemical properties of irrigation water and agricultural fields in the Niayes region of Gadiol.

<b>2. The abstract clearly presents objects, methods and results.</b>	2,5
---	-----

(Please insert your comments)

The style of the abstract is clear overall, but could benefit from a slight revision to improve fluency and comprehension.

<b>3. There are few grammatical errors and spelling mistakes in this article.</b>	4

### Comments and Suggestions to the Author(s):

Here is a brief summary of my comments:

The structure of the text is disorganized and needs better organization into clear sections.

There are grammatical and spelling errors that need to be corrected.

The use of appropriate tables, graphs and quotations will improve the presentation of data.

Some specialized terminology should be explained to make the text more accessible.

Include a clear summary of the results and their significance.

### **Comments and Suggestions to the Editors Only:**

It is better to give references recently published.

### Comments and Suggestions to the Author(s):

Je tiens à féliciter les auteurs de l'excellent travail qui ont mené, cependant pour une meilleure présentation et mis en valeur du travail réalisé, je suggéré d'essayer d'améliorer les points suivants :

- Introduction à enrichir avec des données relatives aux problèmes environnementaux qui peuvent être causés ou liés au problème décrit dans l'article,
- La description de la zone d'étude doit figurer dans la section des méthodes,
- Ajouter plus d'informations sur les matériaux utilisés (pH, GPS et conductivité),
- Références à consolider avec d'autres références récentes,
- Faire une comparaison avec d'autres études qui ont été réalisées dans le même concept.
