Recommendation: Revisions Required

The TITLE is clear and it is adequate to the content of the article.

I would suggest the following title with a small revisions. Be sure to put the name in quotation marks and throughout the text:

Image Semiotics in "the Book our Arabic Language" (for the Third Grade in Jordan):
An analytical study using human and artificial intelligence

The ABSTRACT clearly presents objects, methods, and results.

The ABSTRACT clearly presents objects, methods, and results..

1. But this sentence

"The results also showed that there were differences in the results of the semiotic analysis between the analysis using artificial intelligence and the use of artificial intelligence ..." requires adjustments

2. If we are talking about the analysis of images of human and artificial intelligence, it would be necessary to specify a comparative method

There are a few grammatical errors and spelling mistakes in this article.

in Abstract: intellence

"The most prominent results revealed a male bias in terms of the number of characters, functional roles, social roles, talents and activities, and there was a convergence between the semiotic analysis using human intellence and semiotic analysis using artificial intelligence".

The study METHODS are explained clearly.

I Think this sentence seeks adjustments because it's very difficult for understanding: Then, the semiotics analysis method for the units of analysis content was adopted by analyzing them using AI of categories of analysis and Chat GPT program through putting every category in a form of a question through which it is asked to know the semiotics of the image that consists of a specific category of the categories of analysis, noting that this image is found in the book of Our Arabic Language for the third grade in Jordan.

The body of the paper is clear and does not contain errors.

It's okay

The CONCLUSION or summary is accurate and supported by the content.

it's okay

The list of REFERENCES is comprehensive and appropriate.

References includes 12 titles, onle 3 titles (Bowman E., Mijwil M., Nielsen L.) relate to artificial intelligence
