Recommendation: Revisions Required

The TITLE is clear and it is adequate to the content of the article.

the title is relevant to the question and the objective of the study

The ABSTRACT clearly presents objects, methods, and results.

the abstract includes the different parts

There are a few grammatical errors and spelling mistakes in this article.

objectives and methodology should be in the past

The study METHODS are explained clearly.

there were no criteria for non-inclusion or exclusion
how many files were included
The centres that received the evacuees are not presented. How therapeutic data had been collected (patients treated outside Benin).
the data were not collected from 2015 to 2020, but rather the study focused on evacuee files from 2015 to 2020

The body of the paper is clear and does not contain errors.

Introduction: the question asked is not clear
Results: the following are missing from the results: the characteristics of the population studied; the size of the population studied
Too many graphs. Repetition between graph and text (e.g. fig 1)

The CONCLUSION or summary is accurate and supported by the content.

the conclusion does not meet the objective

The list of REFERENCES is comprehensive and appropriate.

Compliance with Vancouver standards. Harmonise the spelling of authors' names

Comments and Suggestions to the Author(s):

Bien préciser la justification de l'étude
Type d'étude: observationnelle transversale descriptive
la sélection de la population d'étude n'est pas précise
Résultats: décrire la caractéristique de la population étudiée, au plus 5 graphiques,
répondre essentiellement à l'objectif (aspects thérapeutiques). On retrouve le
pronostic, ce qui alourdi le travail
