## Evaluation Criteria:

Please give each evaluation item a numeric rating on a 5-point scale, along with a thorough explanation for each point rating.

<i>Questions</i>	<i>Rating Result</i> [Poor] <b>1-5</b> [Excellent]
------------------	---

<b>1. The title is clear and it is adequate to the content of the article.</b>	<b>4/5</b>
<i>The title of the article is clear and well formulated, offering a precise description of the object of the study. It highlights key concepts, such as social perceptions, traditional seclusion practices and geographical context (the Odzokru in Côte d'Ivoire). However, an explicit mention of the public health implications would strengthen its relevance and attract the attention of readers interested in this field.</i>	
<b>2. The abstract presents objects, methods, and results.</b>	<b>4/5</b>
<i>The abstract clearly presents the objectives, methodology and main results of the study. However, it could be improved by including further details on the analysis methods and concrete examples to illustrate the results. A synthetic conclusion would also reinforce the overall impact.</i>	
<b>3. There are a few grammatical errors and spelling mistakes in this article.</b>	<b>4/5</b>
<i>(Please insert your comments)</i>	
<b>4. The study methods are explained clearly.</b>	<b>4/5</b>
<i>The methods are generally clear, but a few more details on the analysis techniques or on how the data were specifically interpreted could further improve clarity</i>	
<b>5. The results are clear and do not contain errors.</b>	<b>5/5</b>
<i>Overall, the results do not appear to contain any significant errors.</i>	
<b>6. The conclusions or summary are accurate and supported by the content.</b>	<b>4/5</b>
<i>Les "effets néfastes" mentionnés pourraient être précisés. Quels sont les risques spécifiques liés aux plantes médicinales ? Quelles sont les conséquences du confinement sur la santé mentale ?</i>	
<b>7. The references are comprehensive and appropriate.</b>	<b>5/5</b>
<i>(Please insert your comments)</i>

**Comments and Suggestions to the Author(s):**

In conclusion, your study is a valuable contribution to public health and cultural research.

**Suggestions:** Expand on Limitations: Addressing potential limitations of the study could strengthen the overall analysis. Discussing any biases or challenges encountered during data collection may enhance the transparency of the research.
