Overall Recommendation!!!

Accepted, minor revision needed

Comments and Suggestions to the Author(s):

The manuscript is a research study which examines Liberia's response to the 2014-2015 Ebola crisis through a Constructivist lens and analyses how concepts of sovereignty, legitimacy, and international identity were actively constructed during a period of acute vulnerability. It appears to be a good piece. But in order to make it an excellent piece of work for the purpose of publication, the following should be kept in the mind: 1. Abstract must contain methods; 2. Body text is good but it would be excellent if several sub-headings can be merged to bring the discussion and analysis in focus; 3. References need to be added. Such minor revisions will make the manuscript a worthy research paper from the academic point of view. which after publication would attract the attention of the larger community of researchers, scholars and policy planners.
