Evaluation Criteria:

Please give each evaluation item a numeric rating on a 5-point scale, along with a thorough explanation for each point rating.

Questions	Rating Result [Poor] 1-5 [Excellent]
1. The title is clear and it is adequate to the content of the article.	1
(Socio-anthropological analyses examine human society and culture by studying social structures, cultural practices, and the behavior of people within their social and cultural contexts. The methodology in this article makes it qualify for systematic review of trends in the National Solid Waste Management Program in the City of Bujumbura)	
2. The abstract presents objects, methods, and results.	2
(Objectives are not clear in the abstract and in te body. Methodology in abstract is different from the one under methods in the body. Results cannot be correlated with te objectives)	
3. There are a few grammatical errors and spelling mistakes in this article.	4
(Some sentences are in future tense especially in te introduction part)	

4. The study methods are explained clearly.	
(The methods of data collection are not clear. If the authors have particular policies which they wanted to analyse, then search engines such as Google scholar, Free Full PDF and Microsoft Academic Search are not necessary. This therefore brings to the question whether this is a systematic review or a Socio-anthropological analyses)	
5. The results are clear and do not contain errors.	2
(Results cannot be clear when objectives and methods are not clear)	
6. The conclusions or summary are accurate and supported by the content.	2
(Conclusions cannot be clear when objectives and methods are not clear)	
7. The references are comprehensive and appropriate.	2
(Most of the articles listed in the reference section are not cited in the main article)
