Getting acquainted with the article, the following conclusions are:

Opportunity, importance, actuality of the paper theme

The study helps to clarify the influencing factors that promote the high ability students in Ibadan, Nigeria achievements. It is important to find the most optimal variant to do it. Researchers' attention to linking parenting style, peers, self-esteem influence on personality development. A comprehensive, well-organized work of teachers is an important component in the process. This confirms the topicality of the subject.

Paper structure

This article is related to the theoretical and practical aspects. It is constructed carefully, including an analysis of the theoretical knowledge and the assessment of the practical study. The study created a logical structure. The structure of the article includes an introduction, statement of the problem, research questions, methodology, results, discussion of findings, conclusion, recommendations and references.

Introduction may be more compact. The theoretical background of the theme is recommended to associate with a statement of the problem.

Problem definition

The research problem is clearly defined. The topicality of the problem is based by analysis of different authors' theoretical knowledge and associated with the real situation.

Literature review

Theoretical knowledge is adequate theme. The author correctly analyses different points of view, highlighting the main research thought. Recommended more use literature that has been issued in recent years.

Methodology quality definition and scientific rigor

For the comparative analysis of the research results have been used the mathematical data processing methods.

Research relevancy for the scientific and academic community

The research is relevant for the scientific and academic community. There are analysed the basic theoretical concepts necessary to ensure understanding of the theme. This article is related to the practical aspects. It is constructed carefully, including an analysis of the assessment of the practical study.
