Strengths

This is a well-structured and well-researched piece of work. The argument is easy to follow, causing no confusion to the reader at any point.

The author clearly identifies the core research problem, demonstrating extensive knowledge in the field of pragmatics and language acquisition. The literature review covers a wide area of topics, discussing current research on the problem and situating the author's research within the pertinent field of study. The methods utilized to measure the results are adequately explained. The author provides a clear description of the participants and data elicitation tool, outlining the latter's validity and reliability. The results validate the author's conclusions and recommendations.

Weaknesses

The author needs to comply with the journal's style guide.
