**Comments and Suggestions to the Author(s):** Le titre doit être changé comme suggéré pour qu'il soit en adéquation avec le contenu. L'étude est en réalité qualitative et doit être analysée comme telle. Les pourcentages contenus dans le texte ne signifient pas grand-chose dès lors que la représentativité quantitative n'est pas justifiée. Il faut se situer dans une posture de découverte. S'interroger sur les facteurs explicatifs du choix des structures modernes de soins après les traitements traditionnels et s'en tenir à ce que disent les enquêtés.

**Comments and Suggestions to the Editors Only: L'article doit être restructuré, le titre adapté au contenu et les analyses plus approfondies pour qu'il soit publié.**
